

Tone4Life™ Chiropractic Clinical Use Case Sheet

Seller: First Choice Allergy Solutions, LLC (DBA Tone4Life™)
Website: www.tone4life.com

Device Overview

The Tone4Life™ Pelvic Floor & Core Muscle Conditioning Chair is a non-invasive neuromuscular stimulation device utilizing HIFEM technology to strengthen pelvic floor and core musculature while the patient remains fully clothed and seated.

Ideal Applications in Chiropractic Clinics

- Core stabilization support for low back pain patients
- Pelvic floor muscle re-education
- Postpartum core and pelvic recovery
- Functional rehabilitation programs
- Neuromuscular activation for deconditioned patients
- Adjunct to corrective exercise and rehab protocols

Clinical Alignment with Chiropractic Care

Tone4Life™ supports conservative care models by enhancing neuromuscular activation, core strength, and functional stability. It integrates seamlessly into rehabilitation, wellness, and corrective care programs commonly offered in chiropractic settings.

Patient Experience

- 28–30 minute sessions
- Fully clothed treatment
- Non-invasive and comfortable
- No downtime required

Revenue Integration (Chiropractic Model)

Average Session Fee: \$150–\$250

Example at \$200/session:

- 15 sessions/week = \$3,000 weekly revenue
- ~\$12,000 monthly revenue potential
- ~\$144,000 annual revenue potential

Positioning: Non-invasive muscle conditioning and neuromuscular re-education modality suitable for chiropractic, rehabilitation, and wellness-based patient programs. This is a revenue-generating clinical wellness device commonly added to cash-pay service offerings.
